CAREER OBJECTIVE

MERN Stack Developer with hands-on experience in building responsive and secure full-stack web applications using React, Node.js, Express.js, and MongoDB. Skilled in developing authentication systems, REST APIs, and modern user interfaces with AI-assisted development tools. Passionate about solving real-world problems, writing clean and scalable code, and continuously learning modern web technologies to contribute effectively as a Software Developer.

EDUCATION

Master of Computer Applications (MCA)

Quantum University, Roorkee

2026 – Present

Bachelor of Computer Applications (BCA)

Disha Bharti College, Saharanpur

Aggregate Score: 68.3%

2022 – 2025

Higher Secondary Education (12th - CBSE)

Mother Land Public School, Rampur Maniharan, Saharanpur

Stream: Science (Mathematics) | Score: 83%

2022

TECHNICAL SKILLS

Programming Languages:	C, C++, JavaScript (ES6+), TypeScript
Frontend:	React, HTML5, CSS3, Tailwind CSS, Bootstrap, Vite
Backend:	Node.js, Express.js
Database:	MongoDB
Authentication & Security:	JWT Authentication, Role-Based Authorization, OTP Verification, Password Hashing, Google reCAPTCHA, Rate Limiting
API & Services:	RESTful APIs, Nodemailer, EmailJS
Tools:	Git, GitHub, Figma, AI Development Tools
Deployment:	Vercel, Render, AWS (Basic Knowledge)
Other Skills:	Data Structures & Algorithms (DSA), Problem Solving, Debugging, Responsive Web Design

PROJECTS

CRM Project (Full Stack MERN)

Objective: Developed a secure MERN stack CRM application for managing users and customer-related operations with authentication and authorization using token-based security. Implemented OTP verification, rate limiting, secure backend architecture, responsive UI, and efficient frontend-backend integration to enhance application security, performance, and user experience.

Technologies Used: React, Node.js, Express.js, MongoDB, JWT, Nodemailer, REST APIs, Vercel, Render

My Contributions & Responsibilities:

- Built scalable frontend and backend using the MERN stack.
- Implemented JWT-based authentication and role-based authorization.
- Added OTP email verification and secure password reset functionality.
- Integrated REST APIs and connected frontend with backend services.
- Applied rate limiting and backend security best practices.
- Designed responsive UI and optimized application performance.

Live Project: <https://crm-project-sigma-smoky.vercel.app/>

Portfolio Project

Objective: Developed a modern, responsive single-page portfolio website to showcase projects, technical skills, certifications, and professional profile while providing a secure and user-friendly communication platform.

Technologies Used: React, Vite, Tailwind CSS, JavaScript, EmailJS, Google reCAPTCHA v2, React Scroll, Vercel

My Contributions & Responsibilities:

- Developed a fully responsive single-page portfolio using React and Tailwind CSS.
- Implemented a secure contact form with EmailJS and Google reCAPTCHA v2.
- Added smooth scrolling navigation with active menu highlighting using React Scroll.
- Built reusable React components and optimized the UI for desktop, tablet, and mobile devices.
- Integrated resume download/view functionality and social media links.
- Improved user experience with modern animations, interactive effects, and performance optimization.

Samsung Website Clone

Objective: Created a responsive clone of Samsung's landing page with a focus on UI accuracy and user experience.

Technologies Used: HTML5, CSS3, JavaScript, Vercel

My Contributions & Responsibilities:

- Developed the complete frontend from scratch.
- Implemented responsive layouts for multiple screen sizes.
- Recreated sections and styling similar to the original website.
- Improved UI/UX and optimized page performance.

GitHub Repository: <https://github.com/IshuSaini656/samsungclone>

Live Project: <https://samsungcloneone.vercel.app/>

Weather Forecast App

Objective: Developed a weather forecasting application that provides real-time weather information based on user input.

Technologies Used: HTML5, CSS3, JavaScript, OpenWeather API

My Contributions & Responsibilities:

- Built a responsive user interface using HTML5, CSS3, and JavaScript.
- Integrated OpenWeather API to fetch and display live weather data.
- Implemented search functionality for different locations.
- Enhanced user experience with clean design and dynamic updates.

CERTIFICATION

MERN Full Stack Web Development Training

2025 – 2026

Brillica Services, Dehradun

- Completed hands-on training in MongoDB, Express.js, React, and Node.js with practical experience in building responsive full-stack web applications, REST APIs, authentication systems, and database management.
